SOLIDEAL®

CONSTRUCTION PNEUMATICS

MPT - 4L I3

Solideal Multi Purpose Tyres designed and manufactured to produce the very best lifetime, smooth running performance on road with the optimum level of traction off road.

DUMPER 4L R4

Aggressive tread design with optimised lug to void ratio, combined with heavy duty construction make the Solideal Dumper tyre the best performing Dumper tyre available today.

Tractionmaster

Developed in conjunction with one of the worlds leading Construction Equipment manufacturers. Smooth running, low vibration on road, high traction and fast cleaning treads off road.

Excavator WL

Specifically designed and manufactured to give superb tractive ability, stability and excellent road speed and minimise stone trapping on dual tires.

Compactor SM C1

Bias ply construction, tread breakers, rounded tread shoulders for equal distribution of ground pressure and minimal grooving.

Backhoe MR F3

State of the art tread design and heavy-duty construction contribute to this tyre's outstanding performance; long life, stability, superb steering performance and increased cut resistance.

Backhoe SL R4

State of the art tread design and heavy-duty construction contribute to this tyre's outstanding performance; long life, stability, superb tractive and smooth running performance and increased cut resistance.

Grader G2/L2

Solideal Grader tyres offer the optimum in performance; increased traction, manoeuvrability and cut resistance for tarmac, mud, sand and gravel.

Loadmaster L2/G2/E2

The industries newest and best wheeled loader tyre with heavy-duty construction and cut resistant, long lasting tread compound, optimal traction, flotation and steering performance.

Rockmaster L3/G3/E3

Heavy-duty construction, long lasting wear and cut resistant tread compound, optimal traction, stability and life performance

Solideal, designers and manufacturers of the world's most innovative, heavy-duty, construction tyres. Designed and manufactured to withstand the construction industries toughest applications.

"NATURAL RUBBER COMPOUNDS FOR GREATER TEAR & CHUNK RESISTANCE"
